

Krishna's Gita

SURVEY REVIEW AND POSSIBLE
FEATURES

Approach to comprehensive understanding

- Using prior knowledge
- Identifying main idea and summarization
- Making inferences
- Repeated reading
- Visualization
- Collaborative learning

Verse Feed

- A verse feed for each individual dependent on what they've read before and new parts that they can explore.

Search/ask questions

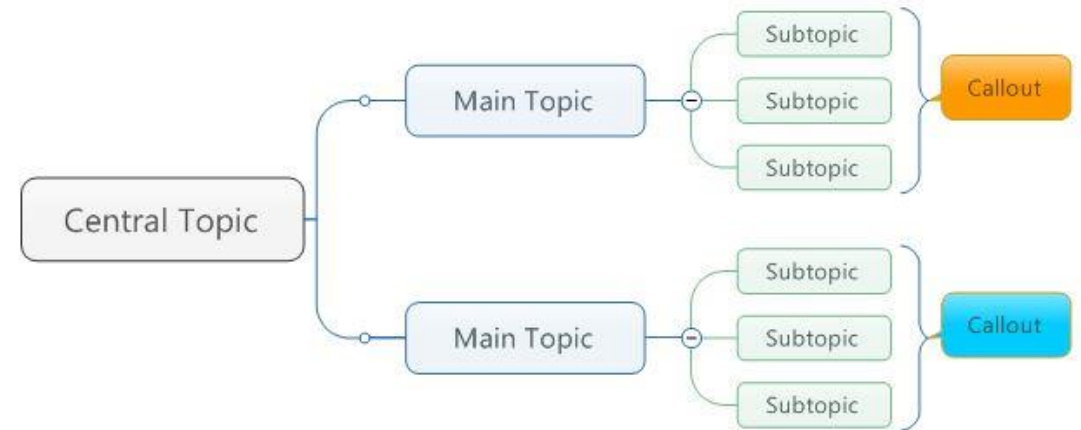

- A search bar where users can:
 - Search for specific verses.
 - Ask questions that they need answers for from the Gita.
 - The answers will include verses from the Gita.

Main idea/topic

- The verses displayed as answers to questions asked and the ones on the feed can be displayed as:
 - The verse number.
 - The main idea will be a gist of the verse. Example:
 - Work according to your nature. Don't be anxious about your goal. Your work will continue.
 - This can be expanded to view the whole verse in detail.

Save what you read

- Each user can have a personal notebook on the app/website to save specific verses, to read again later. Rather than searching for it each time.
- The user can also make notes (Example: write the verse in simple languages that they can understand) for themselves.

Logos and intra links

- Logos for each section (if possible) to make it more visually pleasing and attractive.
- Intra links connecting one verse to another where the connection is required.

Answer sequence

- Each answer verse provided for a specific question can be upvoted or downvoted by the users based on how accurate and helpful it was.
- The next time the same question is asked, the answers are displayed in descending order of votes.

Personal progress

- Have a virtual plant that grows based on the user's mental health and the verses read.
- The users can water the plant whenever they feel like they've learnt something and grown.

Thank you

- DRISHTI HOSKOTE
